

## STAGE BACK

### GENERAL NOTES

**Inputs Required: 2 vocal mics (lead vox mic provided by band, keys player does backing vocals), 2 instrument mics (guitar amp, keys amp), drum kit mics, 2 DI (synth bass out, sampler)**

Organ amp gets one mic on left 12" speaker of organ Amp. Comp on vocals is OK. Use reverb effect on lead vocals. Backing vocals about ½ volume of lead vocals in FOH. Guitar and organ should receive about equal presence (volume) in the sound stage. Keys are a lead instrument in our band. Keep in mind, organ volume will swell during the show due to organist controlled volume pedal.

Thank you for doing our sound.
